

OCI Courier System

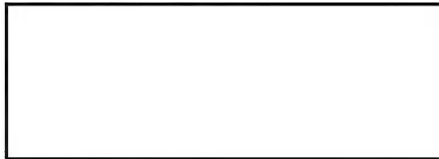

Intelligence Information Staff

Belt OCI suits

Courier System established 11 years ago by DCID 1/6

Couriers

Couriers have:

Fire Arms Permits

Top Secret, SI, R&D, Que, Cosmic, Seato, Nato

Drivers Permits

4 cars all 2 way Radio Equipped

These are outside Couriers who service the White House, State, NSA, etc.,
(See attached schedule).

OCI does not require receipting and control behind the barrier, even
to OSI behind the barrier.

Cal 61 OCI handled 63,837 pieces of mail. 1900 of these were bulky
pouches for Overseas.

Of the 63,837, OCI Couriers handled 54,000-the balance was handled by the
Central Mail and Courier Service.

OCI has a list of names of authorized recipients, both Agency and Outside
which couriers must know.

Normally Courier Receipt Form 240 used on all outgoing material.

All SI material pouched through O/S Registry.

OCI handles all SI material for Commo.

Couriers always travel in pairs and carry Fire Arms.

Outside Couriers sometimes fill in Registry with logging, etc.

Central Courier can only deliver to barrier and pick up mail at this point.

STAT

OCI has ☐ Couriers assigned from the Central Courier Service making internal deliveries-also shown in attached schedule.

OCI says outside couriers ^{KNOW} ~~are~~ generally the contents of documents they are carrying but that they are not permitted to answer specific on general questions concerning a subject or intelligence matter. They are instructed to answer that they don't know but will see that the requestor is furnished the information.

OCI says they no longer make the run to AEC Germantown, but have arranged to meet an AEC courier who rides a bus to 1717 H Street from Germantown. Does this indicate that much of the other OCI material can be delivered through normal channels and can go at a slower speed than the Special or Hand-Carry method.
